

The Qitele logo is displayed in a bold, yellow, sans-serif font in the upper right corner of the slide. The background of the entire slide is a photograph of a tall, ornate, light-colored building with many windows, set against a blue sky with scattered white clouds. A large, diagonal graphic element, consisting of a blue triangle and a yellow triangle, cuts across the slide from the top left to the bottom right.

2019 China Educational Equipment Exhibition

# PLASTIC PARTICLES RAW MATERIAL

POLYETHYLENE PLASTIC PARTICLES

## PLASTIC PARTICLES

It uses food-grade linear low-density polyethylene imported from Dow and ExxonMobil in the United States. It has the advantages of high strength, good toughness, rigidity, heat resistance, and cold resistance. It also has good environmental stress cracking resistance and impact resistance. , tear resistance and other properties. The thickness of the plastic wall reaches 6-7mm.

# PLASTIC POWDER RAW MATERIAL

German Pallmann Grinding Machine

POLYETHYLENE PLASTIC PARTICLES

## PLASTIC POWDER

The plastic's UV resistance reaches level 8, and it has strong antistatic ability. It is colorful and does not fade or deform easily. The finished product is smooth inside and outside. It is safe and environmentally friendly, non-toxic and tasteless, and has no irritation or allergic reaction to the skin.

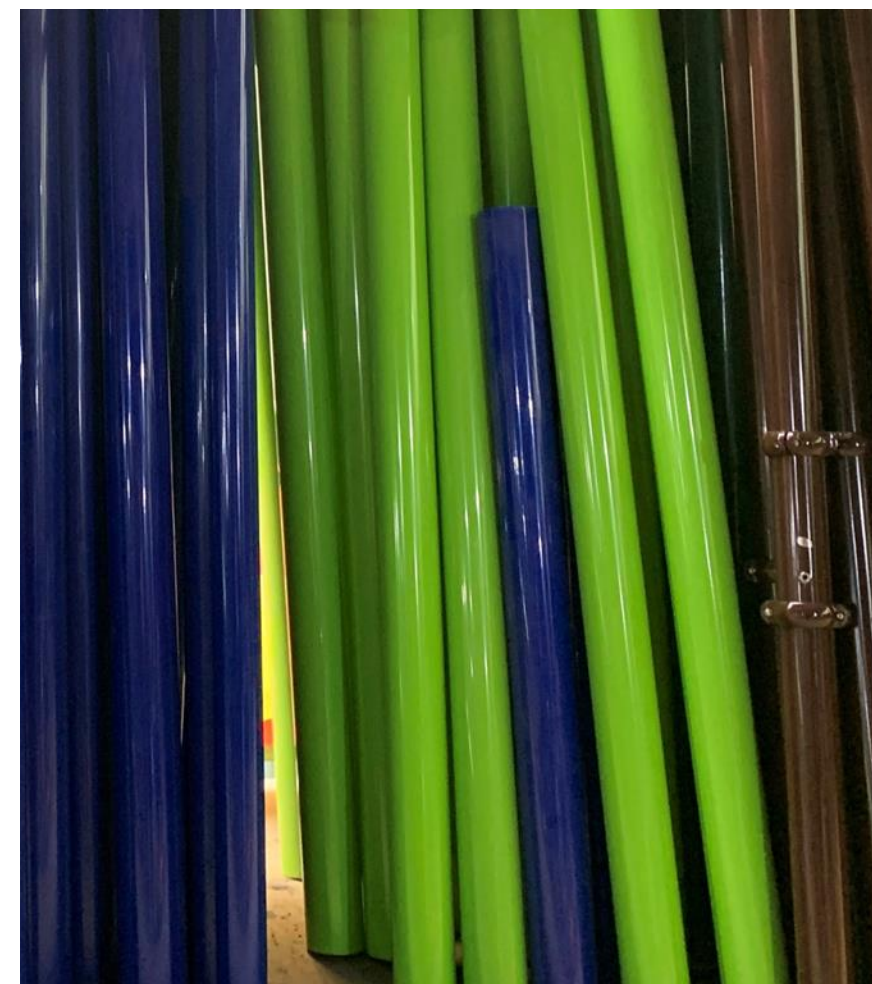

GALVANIZED PIPE

# RAW MATERIAL

THICKNESS 2.3MM GALVANIZED PIPE

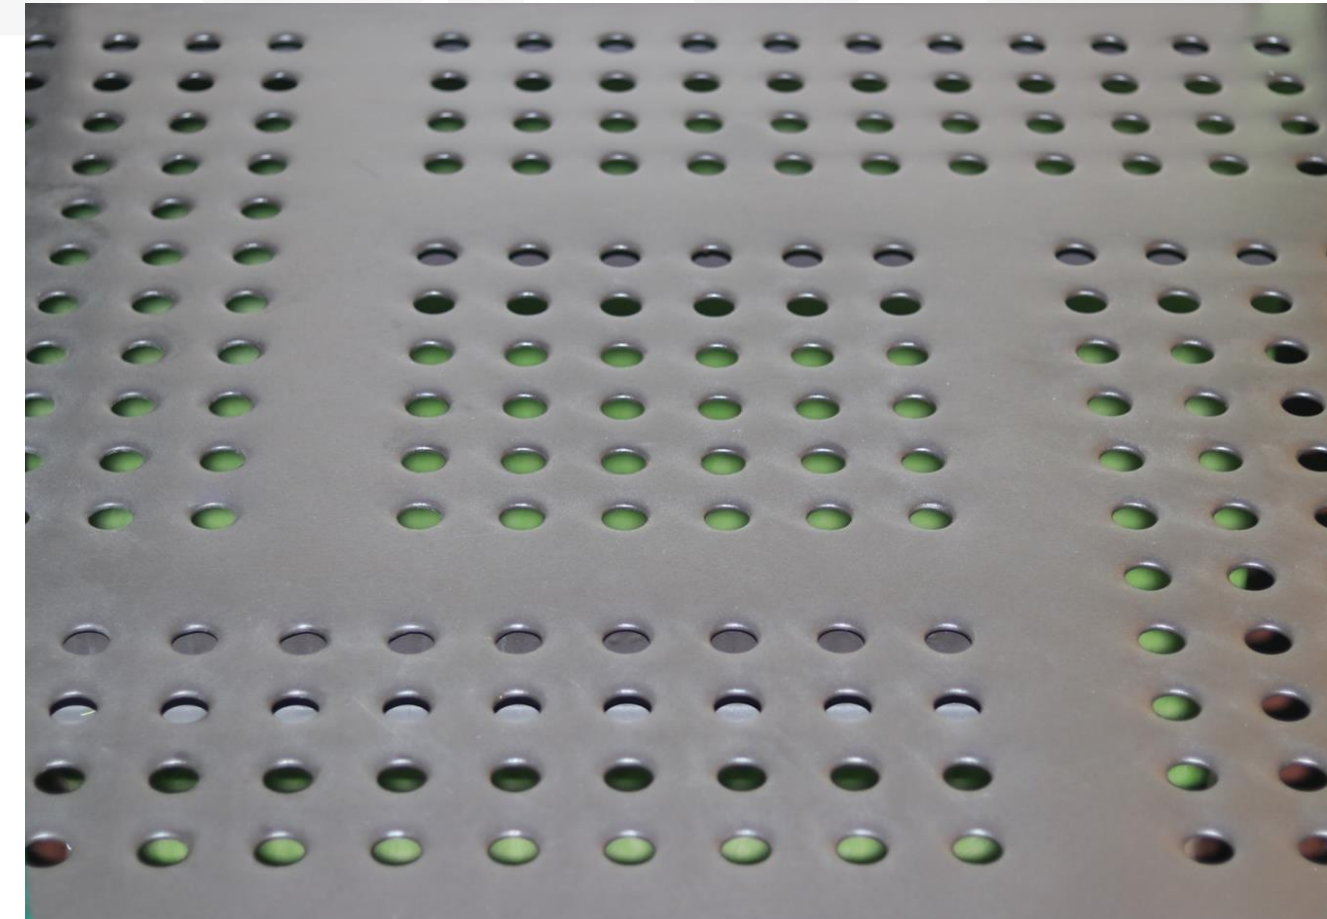

## GALVANIZED PIPE

The galvanized layer is more than 180g/m<sup>2</sup>, and it has strong corrosion resistance. Surface treated by low metal electrostatic powder coating technology which is from Aksu in the Netherlands, adding anti ultraviolet stabilizer to powder spraying material, reach the level-5 anti UV standard can remain bright for a long time, meeting the national safety standard for playground equipment.

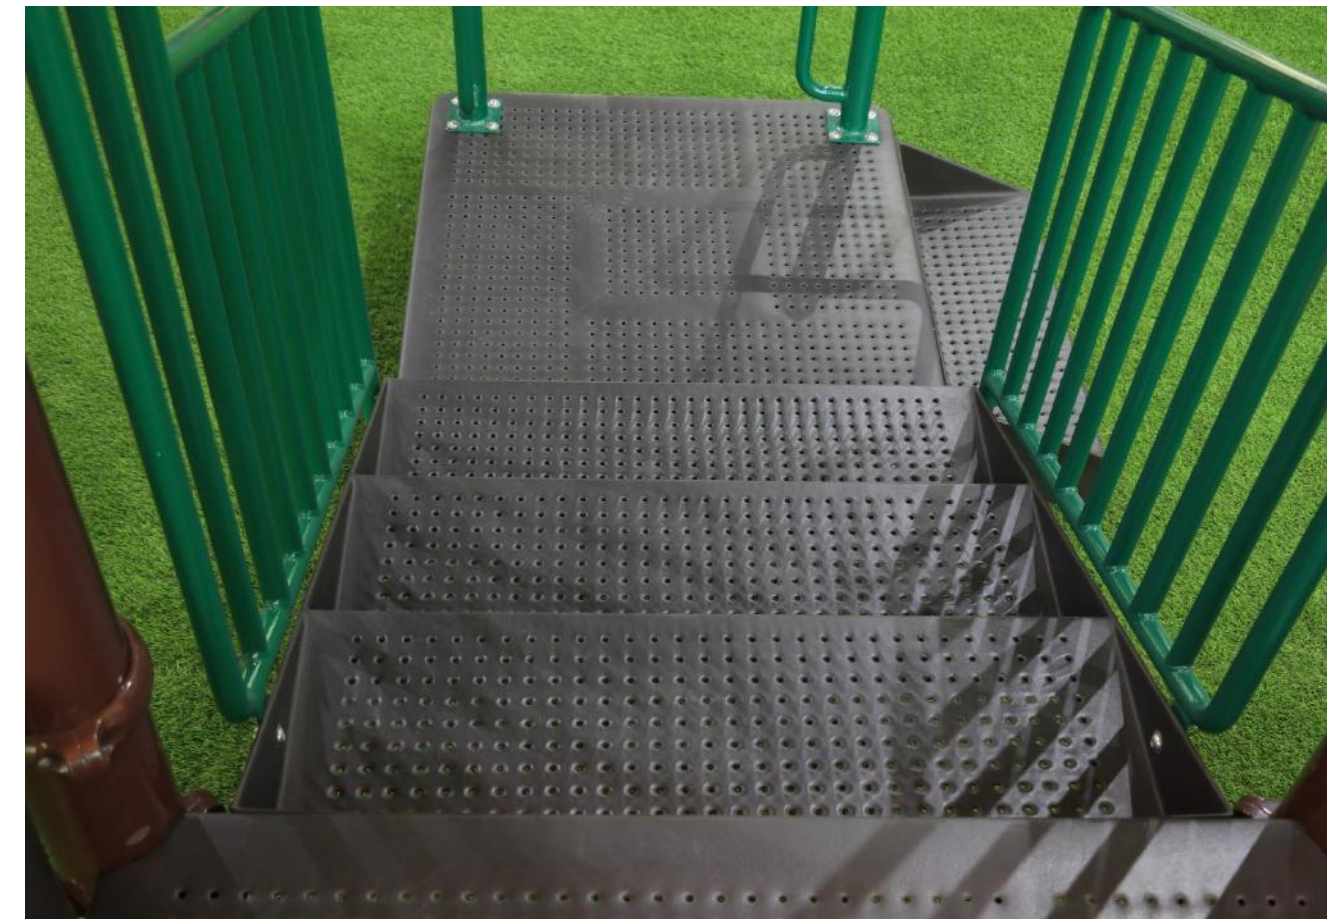

# PLATFORM RAW MATERIAL

GERMAN BASF PVC

## PVC COATED PLATFORM

EN standard cold rolled steel plate, punched once by the computer program, no sharp burr, surface covered with German BASF PVC material. There is a soft contact function on the surface of PVC coating to have a slight protective layer for users. Platform structure design: Well shape design increases load-bearing and reinforcement, bearing capacity not less than 450 kg.

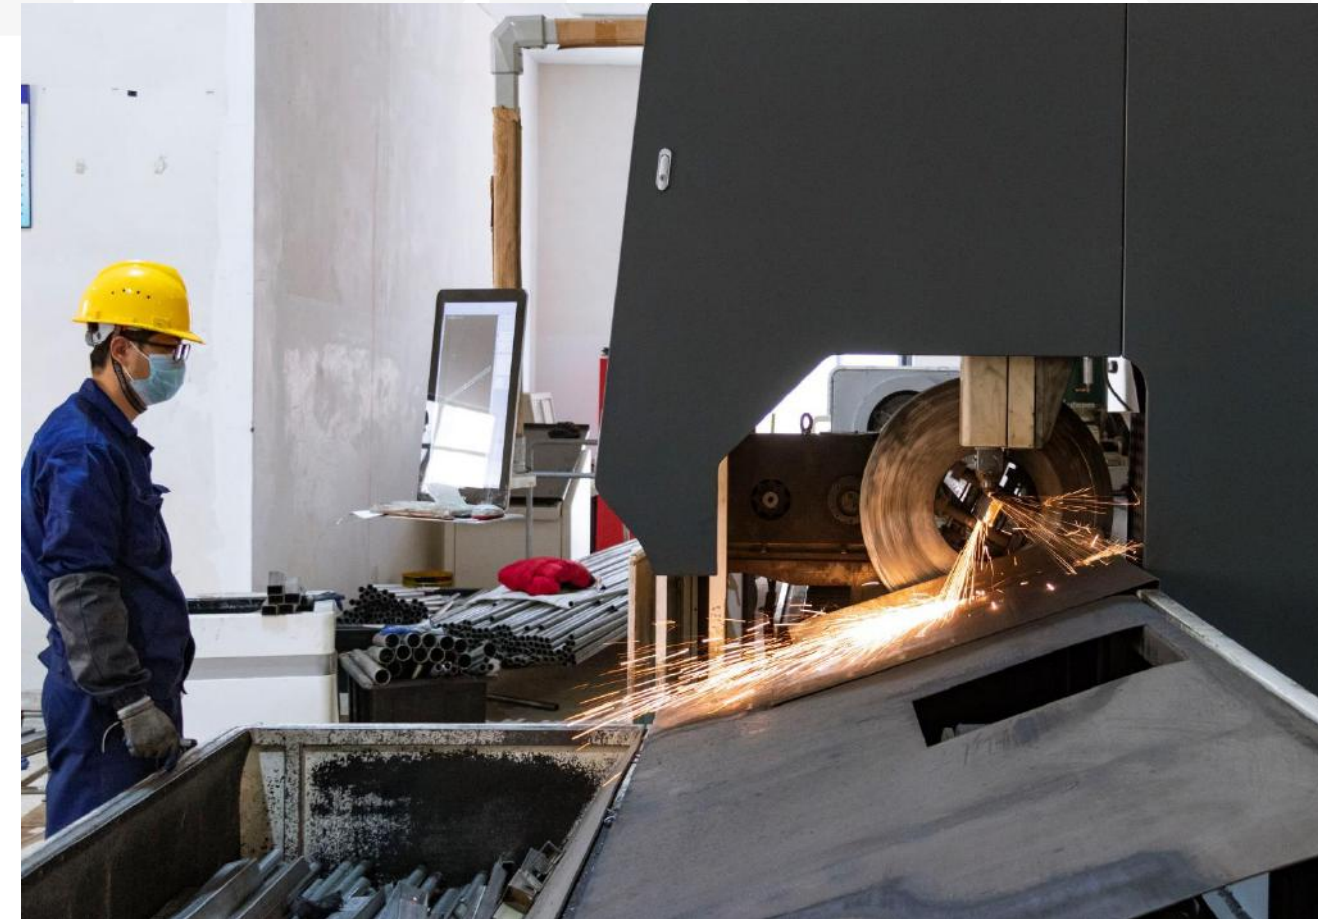

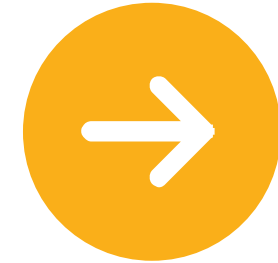

MAIN PRODUCTION EQUIPMENT

# PRODUCTION PROCESS

## LASER CUTTING MACHINE

A high-tech fiber laser cutting machine integrating laser cutting, and precision mechanical CNC technology.

## ROBOTIC WELDING MACHINE

Machines instead of labor-scale production, improve product quality and reduce marginal costs.

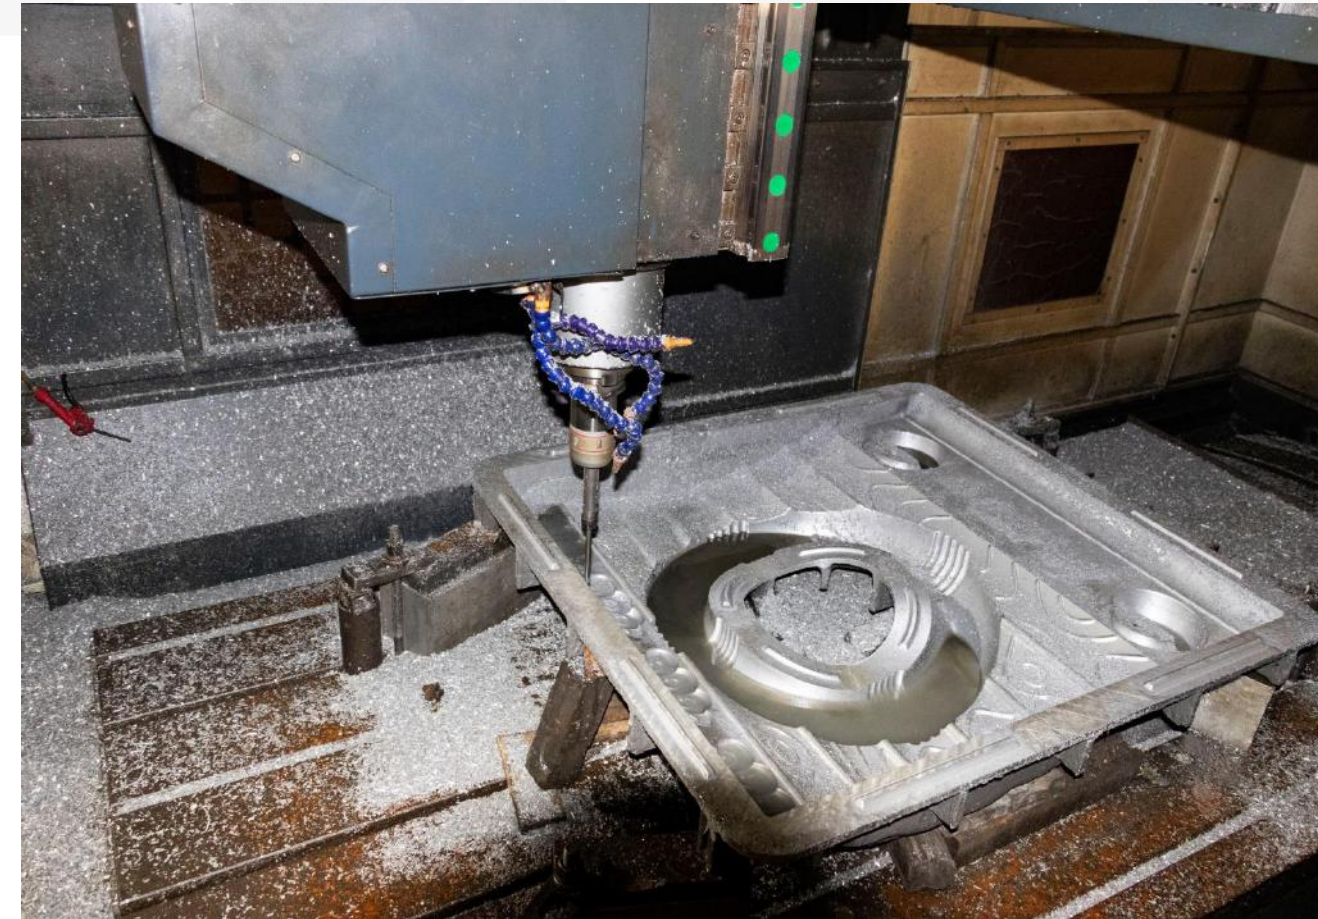

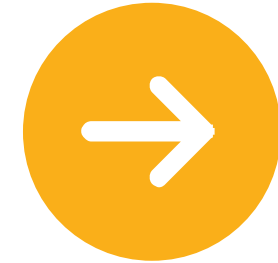

MAIN PRODUCTION EQUIPMENT

# PRODUCTION PROCESS

## CNC CENTER

Qitele owns 3 advanced CNC equipment.  
The mold material is aluminum, better  
than iron mold.

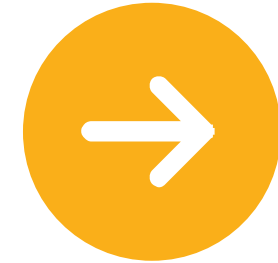

MAIN PRODUCTION EQUIPMENT

# PRODUCTION PROCESS

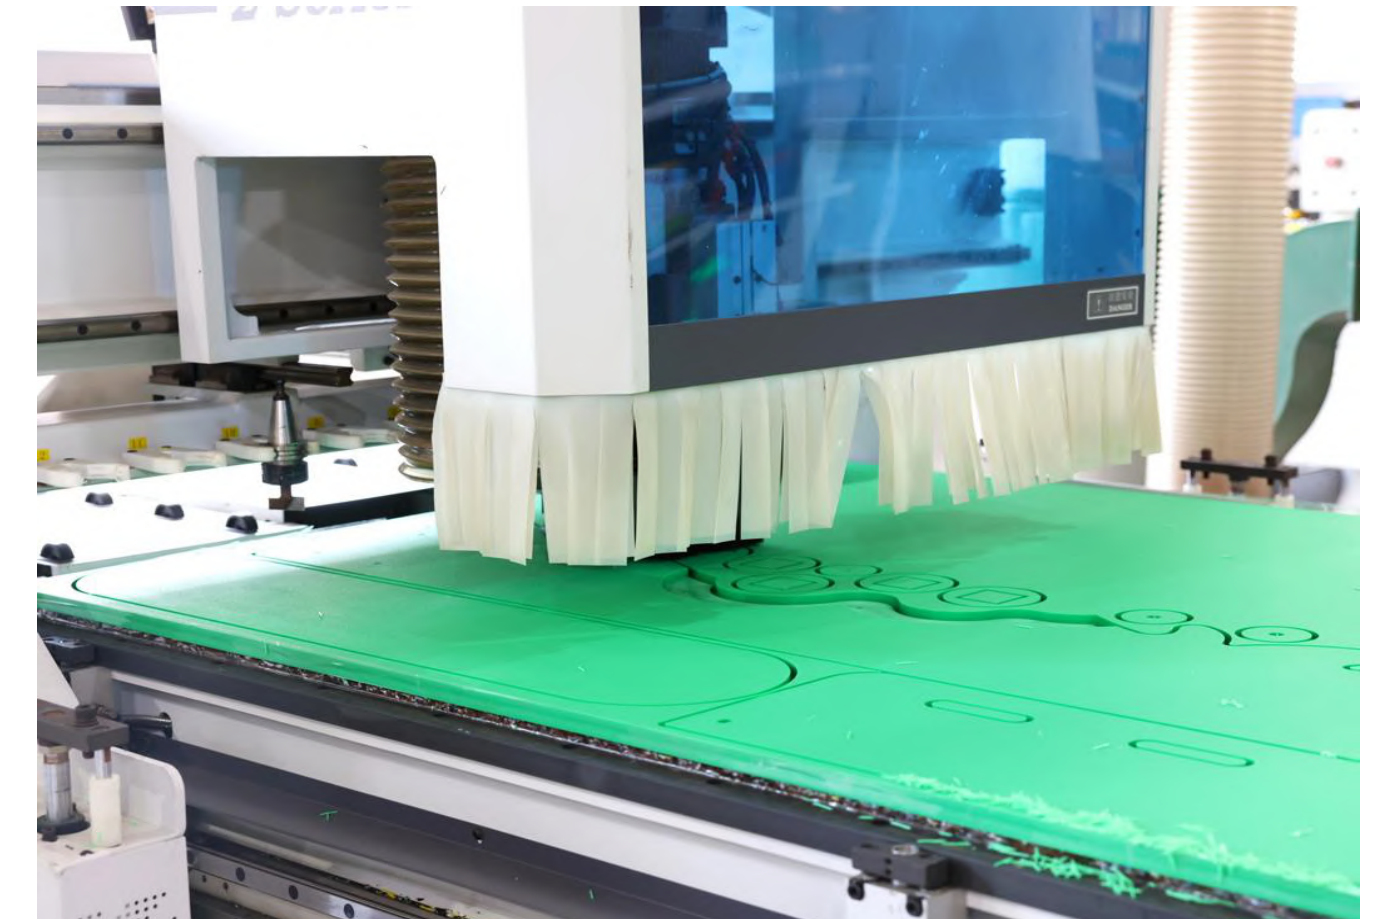

## PE BOARD PRODUCTION LINE

The raw materials are first mixed, heated, and dissolved, then cooled and cut into board.

## LASER CUTTING AND CARVING MACHINE

Qitele owns a total of 8 sets of laser cutting and carving machines, which are flexible, high precision, high efficiency, high quality, and automation.

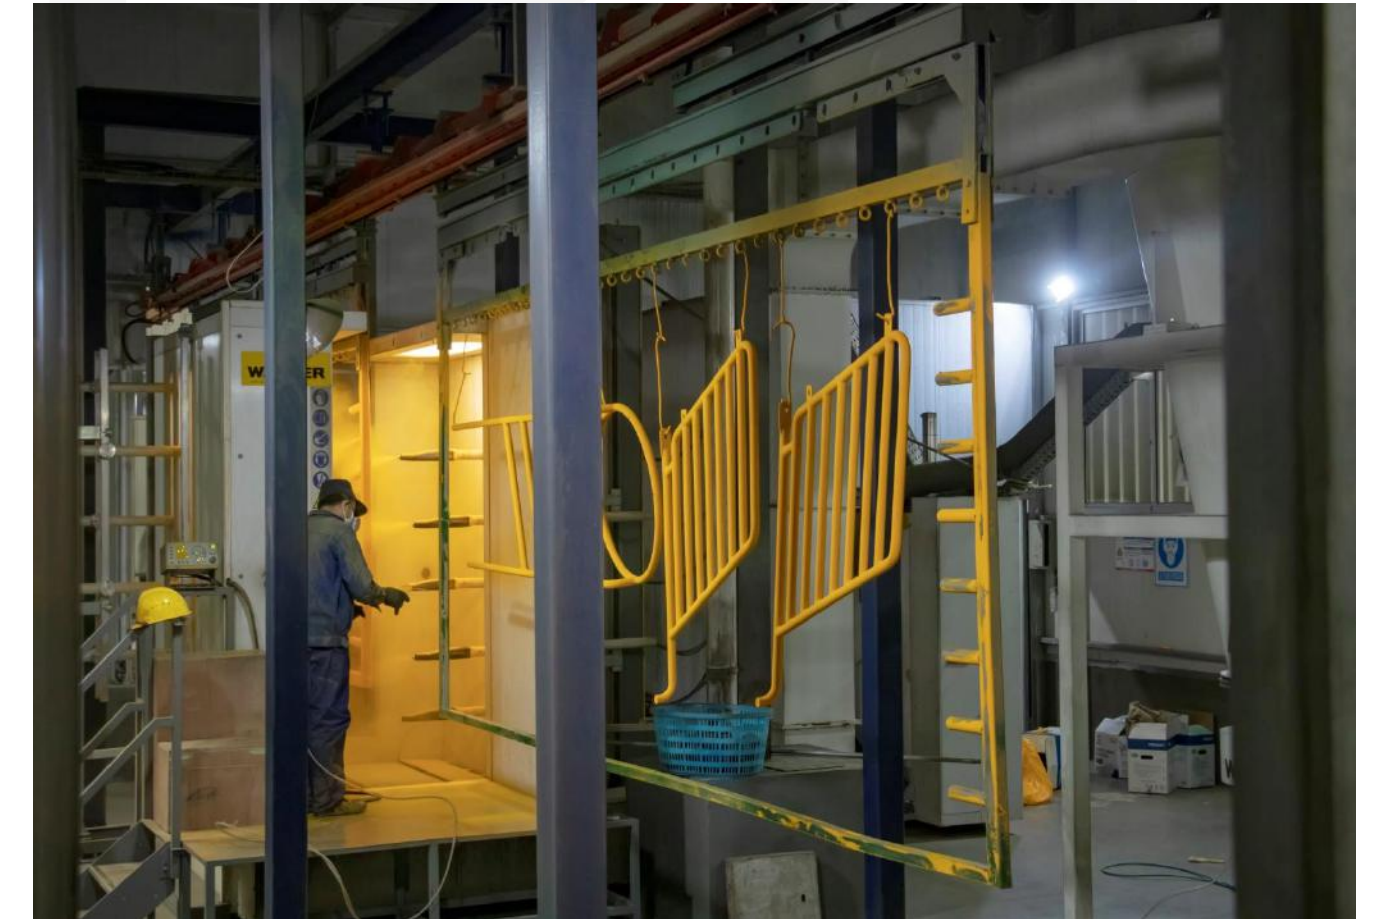

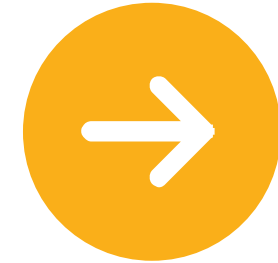

MAIN PRODUCTION EQUIPMENT

# PRODUCTION PROCESS

## AUTOMATIC SPRAYING LINE

Automatic spraying line imported from Germany. The production efficiency is increased by 3-4 times.
